EDUCATION

New York University

GPA 3.8/4.0

Bachelors of Science in **Computer Science & Economics**

Expected May 2027

- ❖ **Relevant Courses:** Python, Java, OOP, Data Structures, Computer Systems Organization, Statistics, Algorithms, Discrete Mathematics, Fundamentals of Machine Learning
- ❖ **Activities and Awards:** Joint Honors Program, Google Developers Group @ NYU, Smart Woman Securities, Society of Women Engineers, Model United Nations, Hemmes Engineering and Research Society

WORK EXPERIENCE

Lea Technologies

New York City, NY

Software Engineering Intern

May 2026 - Present

- Designed and refined AI-powered data extraction models for multiple \$10B+ AUM wealth management firms, achieving 100% accuracy on validated document extraction benchmarks.
- Built internal admin dashboard interfaces for model monitoring and operational workflows. Ran model evaluation pipelines and performance analyses, iteratively improving model accuracy and reliability.

The Commons XR

San Diego, CA

Full Stack Engineering Intern

December 2025 - May 2026

- Built a responsive React dashboard powered by Plotly.js that translated complex datasets into real-time visual insights.
- Developed scalable frontend architecture (Context + useReducer) with client-side caching and integrated secure Flask/BigQuery APIs for reliable data delivery.

Kodely.io

New York, NY

Software Engineer Intern

August 2025 - Present

- Shipped **education management software** used in **60+ schools**, supporting nationwide turn-key after-school programs
- Maintained the **full stack** (React Native mobile app + Node.js/TypeScript backend + PostgreSQL/Redis) for a staffing system connecting **300+ substitute teachers** with real-time shift requests, teacher availability and curriculum updates

University of California–Santa Cruz Baskin School of Engineering

Santa Cruz, CA

Software Engineering Intern

June 2024 - August 2024

- Co-authored a working **paper** with faculty mentor (**Frontiers Research**); Prototyped interactive systems in Unity Ops(C#)
- Instrumented telemetry surveys; conducted to study UX patterns for acculturative behavior among Latinx players.
- Built a cooperative cooking game exploring machismo dynamics; iterated through usability testing and heuristic evaluations.

PROJECTS

CivicSpeech — Presidential Speech Analytics

2nd Place, NYU Data Science Expos

- Scraped UVA's Presidential speech archive with Selenium + BeautifulSoup, normalizing metadata into an **SQLite3** schema (speeches, recordings, metrics); Processed **3,064+ audio** recordings speech **to text** via an ASR and **Selenium** pipeline
- Computed readability features for modeling via Gunning Fog index and lexical counts; Trained **Random Forest, Clustering, Linear Regression** models in scikit-learn to model text-complexity scores and trends across administrations

“Frame Her” Semantic Search Engine | Python, Flask, React, SQLite3 Database

Google Collabs Project

- Built **vector-based retrieval** that indexes video frames by visual content using **OpenCLIP** and **Ultralytics object detection**.
- Stored embeddings and frame sampling in **SQLite3** and performed **cosine-similarity** search for top-k retrieval.

LEADERSHIP EXPERIENCE

Google Developer Group @ NYU

New York, NY

Tech Lead

February 2025- Present

- ❖ Mentor a **5-person** AI Investor Startup connection board, worked on ,code reviews, sprint planning, and demo readiness.
- ❖ Ship hands-on sessions (LLM patterns, basic ML & API integration) and maintain starter repos to accelerate project setup.

Languages & Frameworks: Java, Python, C++, C#, JavaScript/TypeScript, Swift | React/React Native (Expo), Flask, Node/Express, SQL, MongoDB, Selenium,
